Intro

From the fantastic to the pragmatic. . . I am a licensed Architect with deep expertise in teaching design, encompassing theory, design-build, digital representation, AI, and professional practice. My courses thrive on ambitious projects driven by intensely personal connections between the students and their work. I empower students to transform well-researched concepts into detailed, responsible designs that effectively communicate their intentions. I bring an experienced and curious design sensibility, rigorous methodology, and a limitless digital visualization toolkit to my teaching. My classes thrive in the organized unknown, pushing boundaries. . . whether formal, ecological, material, social, or conceptual.

Education

IIT College of Architecture
ILLINOIS INSTITUTE OF TECHNOLOGY
Masters in Architecture | 08.2004 - 05.2007
Chicago, IL

UNIVERSITY OF WASHINGTON
Graduate Work in Architecture | 06.2002 - 06.2004
Seattle, WA

WHITMAN COLLEGE
Bachelor of Arts in Biology | 08.1996 - 05.2000
Walla Walla, WA

Publications | Exhibitions | Honors | Awards | Service

COLLEGE AND CAMPUS SERVICE

- CMDI Faculty Council Member and Chair of ACAD (Academic Community and Diversity Committee). Providing leadership to support faculty culture, belonging, and shared identity across CMDI. Helping position ENVD as a model of healthy faculty and staff collaboration while building cultural cohesion within our newly formed college. — 2024-current

ENVD LEADERSHIP AND GOVERNANCE

Executive Committee (Teaching Faculty Representative) — 2022-2024

- Elected to represent the ENVD Faculty at the teaching level for a two year term on the ENVD Program leadership team.
- Created momentum around various initiatives, including student support, first year experience, mental health, FRPA evaluations, Artificial Intelligence and the pedagogical implications as well as communications and marketing.

Boulder Faculty Assembly (BFA) Representative for ENVD — 2023-2024 AY
Chair of the ENVD Lectures Committee — 2024 - Current
Chair of the ENVD Scholarship Committee — 2017 - 2022

Recipient of the Payden Teaching Grant — 2025

- For the development of the ENVD 1120 "Urban Rewilding Course"

Exhibit on the future of AI and Design in the ENVD Gallery. — 10.2024

- Speculative student work from my course "Lassoing the Robots" featured alongside the AIA traveling exhibit, "Architecture After AI" envisioning the world in 2049 and the potential integration of AI into our lives and livelihoods.

Publications | Honors | Awards

Architecture Masterprize Winner in the Categories of Small Architecture and Miscellaneous Architecture. 09.2018

- This was awarded to the Luminous Ticket Center Design/Build project
- For this project I instructed 18 students in the creation of 2 mobile ticket centers for the Denver Botanic Gardens.

Denver Mayors Award in the Distinctively Denver Category 09.2017

- This was awarded to the Luminous Ticket Center Design/Build project
- For this project I instructed 18 students in the creation of 2 mobile ticket centers for the Denver Botanic Gardens.

AIA Award of Excellence in the Built Works Category for "909 Walnut" Project 06.2017

- Was a designer on the Project team at Arch 11 that designed and oversaw the construction of this mixed use project in Boulder.

AIA Merit Award in Unbuilt Work Category for "Whiskey Still" Project 10.2016

- Acted as the Project lead for Arch 11 on a project that converted a industrial urban lot into a agri/industrial Whiskey distillery.

ENVD Playscape Design/Build project 06.2016

- Instructed 18 students in the creation of 2 playgrounds for a low income housing community in Denver.
    - Project Featured on 9 News Broadcast (Denver)
    - Featured multiple times in CU Boulder Today (online)
    - Article of the Project featured in the Coloradan (print)

Jury Member for ASLA North West Chapter Landscape Awards 10.2015

Generative AI in Design Leadership

- Selected as an AI Literacy Ambassador for CU Boulder (2024 to 2025), contributing to campus wide strategies that support responsible and thoughtful integration of Artificial Intelligence into teaching and learning practices.
- Served on the Boulder Faculty Assembly AI Working Group (2024 to 2025), helping develop guidance and frameworks for ethical AI use related to authorship, creativity, learning integrity, and pedagogical policy.
- Creator and Professor of CU Boulder's first generative AI design course, Lassoing the Robots (2024 to present). This course focuses on the intentional use of AI as a creative collaborator while maintaining a strong emphasis on human creativity, empathy, and cognitive resilience. Student work from this course was exhibited in the ENVD Gallery alongside the AIA traveling exhibition Architecture After AI.
- Developed ongoing cross institutional AI collaboration with SCAD faculty member Cas Esbach, exploring advanced AI design workflows, cognitive implications, and shared curriculum development to support international dialogue in architectural education.
- Developed and delivered professional AI workshops to local architecture firms and design organizations, sharing ethical frameworks, visualization strategies, creative workflows, and productivity applications to help the professional community thoughtfully integrate AI tools.
- Participated in national conversations on AI through involvement with ACSA programming focused on AI in Architectural Education, sharing insights developed through ENVD student town halls, faculty workshops, and curricular experimentation.

Professional Experience

University of Colorado Boulder | teaching associate professor | boulder, co | 01. 2010 - current

- Taught several courses in CU Boulders' Department of Environmental Design including: Introductory and Advanced Design Studios, Design-Build projects, Design Theory, Design Ethics Digital 3D Modeling, Parametric Design, Digital Design and Fabrication, and Rendering and Animation.
- Created and delivered a dynamic series of original lectures and course content, covering various aspects of Architecture, Graphic Design, Landscape Architecture, Urbanism, Product Development and other design related disciplines.
- Created several opportunities for student's work to be seen outside of the classroom through public exhibitions and social media.

Arch 11 | designer | project manager | boulder, co | 01. 2014 - 11. 2016

- Developed extensive skills in Project Management, CA and Documentation at the scale of restaurants, showroom spaces and high-end residences.
- Worked directly with contractors and fabricators to create award winning and incredibly unique design elements.
- Performed Construction Administration and Project Management duties on high profile restaurant and commercial projects.

DAVIS PARTNERSHIP ARCHITECTS | intern architect | denver, co | 01. 2013 - 01. 2014

- Designed and developed a Health Care Project on the CU Boulder campus through all phases from design to CD's and participated in multiple Design Review Board Presentations.
- Became the rendering Czar crafting several photo-realistic renderings for projects throughout the office and leading workshops on Rendering and Rhino instruction.
- Worked on several high profile design competitions developing overall design concepts and supporting diagrams and imagery.

RNL | intern architect | denver, co | 7. 2012 - 11.2012

- Collaborated with a team of architects and urban planners to design and develop two high profile projects in Jeddah, Saudi Arabia, including a multi-modal mixed-use transport center, medical center, shopping mall complex and an outdoor market with high end residential.
- Directed projects from Conceptual Design and into Schematic Design.
- Coordinated with Structural and Mechanical Engineering Consultants.
- Traveled to Dubai for client design presentations and workshops.

PODMAJERSKY | project designer | chicago, il | 07.2008 - 12.2010

- Managed all aspects of the design and construction of several unique studios, lofts, galleries and industrial spaces in the heart of the Chicago Arts District.
- Worked closely with Podmajersky family to create a long term vision for the neighborhood and the revitalization and expansion of the Chicago Arts District's main commercial artery.
- Led a highly skilled construction crew on a daily basis in the creation and transformation of several old factories, churches, and warehouses into incredible, efficient modern space.
- Performed zoning, code compliance, and permitting for all projects.

Professional Experience (continued)

MVRDV | junior architect | rotterdam, nl | 09.2007 - 05.2008

- Tirelessly executed extensive design work on multiple high profile international competitions and commissions including a central Train Station complex in Bologna Italy, a 300m landmark bridge in Chengdu, China, a residential tower in downtown London, a Graphics art school and Theater complex in Rotterdam, and a Pavilion for the Milan Triennale.
- Performed extensive research for various design and research initiatives within the office.
- Directed teams of professional model makers, renderers, and animation firms in the production of competition materials.

UIC COLLEGE OF ARCHITECTURE & THE ARTS | lecturer, studio critic | chicago, il | 10. 2008 - 05.2010

- Delivered lectures on various topics to 4th and 5th year undergraduate architecture studios including lectures on programming, diagramming, and personal design initiatives.
- Participated in numerous reviews and studio critiques at the graduate and undergraduate levels.

BOOTH HANSEN | intern architect | chicago, il | 04.05 - 09.05, 05.06 - 09.06

- Became a LEED Certified AP and performed full documentation and submission for the certification of a LEED Silver rated project.
- Created 3D models, design drawings and construction documents for high-end residential projects including several skyscraper additions to Chicago's Downtown loop area.
- Collaborated with project managers and clients to identify and develop sustainable strategies for new projects.

VA Medical Center | research scientist | Seattle, WA | 07.2000 - 08.2004

- Prior to embarking on an architectural career I acted as a Research Scientist for the VA Medical Center and University of Washington in Seattle. I performed research in Neurology from 2002 to 2004 and also served as the Administrator of the Morphological Analysis Center. Previous to 2002 my work was focused on Cancer Research and the discovery of novel proteins.
- Credited as an author and contributor on numerous scientific and research publications.

Creative Work Exhibitions

- Exhibit on the future of AI and Design in the ENVD Gallery 01.2024
- Solo Photography exhibition, Hangar41 Art Gallery, Denver CO 01.2012
- "r. g. b.", Interactive light installation. The showPODs, Chicago Arts District 06.2010
- "A copy?", Part of "Reamscapes" exhibition. The showPODs, Chicago Arts District 03.2010
- "2009 On a Line" - Photography/Sculpture Installation, CAD Select, Chicago, IL. 01.2010
- "Red Green", Holiday subversion light installation, Chicago Arts District. 12.2009
- "As Is", Sculpture Installation, Pilsen East Artists Open House 10.2009
- "Line Series", Photography Installation, Artropolis/NEXT, Chicago, IL 05.2007
- "Chicago Slow Down" and "Patterns" in Arch.City.Art exhibition, Chicago, IL 03.2007
- "Bridging the Divide", Johnsonese Gallery Group Show, Chicago, IL 12.2006
- "Patterns of Settlement", Photo Installation, CS36 curated show. Chicago, IL 10.2006
- "Corner and Cornice", Photo Installation, Gould Hall, CAUP, Seattle, WA 09.2004
- Art work exhibited nationally, with works held in public and private collections.

jeremy ehly AIA, LEED

Critical Skills

Digital

- Intentional use of Artficial Intelligence in design processes.
- High Quality Digital 3D Modeling (3dsMax, Rhino, and SketchUp)
- High Quality Digital Rendering and Animation (Mental-Ray, V-Ray)
- Skilled in Virtual Reality Environments and modeling.
- Parametric modeling with Grasshopper plugin for Rhinoceros
- Drafting (Revit, AutoCAD)
- Creative graphic design and layout (InDesign, Illustrator, Photoshop)
- Interactive web design

Analog

- Professionally Licensed Architect since 2017.
- Member of the American Institute of Architects (AIA)
- LEED AP Certified Sustainable Designer since 2006
- Extensive knowledge of current Digital Fab Techniques (CNC, Laser, 3D printer).
- Expansive network of local design professionals to engage for critiques, lectures and seminars
- Extensive experience in on-site construction, scheduling, and management.
- Professional photography and lighting.
- Extensive experience with Exhibitions, Installations, and Publications.
